RIVER - WARNING! RISK OF DEATH!

There are many bays and beaches along the Rhine and Main rivers. You can use them freely.

**BUT DO NOT GO INTO THE WATER!
SWIMMING IN THE RIVER IS INCREDIBLY DANGEROUS
AND COULD EVEN RESULT IN DEATH!**

While on the surface the water may appear calm. Underwater there are currents and whirlpools. These are extremely dangerous. Boats and ships can create strong waves that can drag you into the river. The rivers are very deep and cold! You may suffer from cold water shock! The riverbanks can be steep in some places.

Please do not go swimming in the rivers!

Go swimming in an outdoor pool or bathing lake.

Please think about your family and stay on the banks! And most importantly: always stay with your child. Talk to your children, friends and families about the dangers of swimming in rivers.

Thank you!

You can find a list of outdoor pools and bathing lakes here:
